

Clinic stool with gas lift h449_180

Standing stool with padded seat and steel - nylon structure. Dimensions: D 24 x H from 51 to 76 cm

The **technical stool H449_180** is a **professional clinic seat** designed to support the operator in a semi-erect position, the so-called “**standing support**” posture. Ideal for healthcare environments like **clinics, medical offices, and laboratories**, it offers **ergonomic support** for activities requiring quick movements and flexibility.

The seat is **padded with high-density foamed polyurethane**, covered in resistant **ABS**, with an **internal structure in PPL reinforced with steel bars**. This combination guarantees **comfort, durability, and stability**, even with moderate use up to **6 hours per day**. The **steel and nylon structure** is robust and designed to withstand up to **120 kg** of weight.

Without backrest and armrests, this stool is perfect for dynamic environments. The **gas lift**, TUV certified, allows you to adjust the seat height from **51 to 76 cm**, adapting to the user's operational needs. No wheels are present: the base is fixed, to ensure **maximum stability** during use.

Order the **technical stool H449_180** now to improve posture and productivity in your clinic. Contact us for multiple orders or further technical information.

FAQ:

1. **What is a “standing support” stool?**

It is a seat designed to support a semi-upright posture, useful for those who often work standing but need a point of support.

2. **Is the stool suitable for prolonged use?**

It is recommended for moderate use up to 6 hours per day, ideal for short shifts or alternating use.

3. **Is the seat padded?**

Yes, with high-density foamed polyurethane for greater comfort.

4. **Does the product have wheels or is it fixed?**

It is fixed, it has no wheels, to ensure greater stability during use.

5. **Is it height adjustable?**

Yes, via TUV-certified gas piston with an excursion from 51 to 76 cm.

Mini purchase guide:

The **technical clinic stools** must offer **comfort, stability, and practicality**. For those who often work standing but need relief, a “standing support” seat like the H449_180 model is ideal.

The **absence of backrest and armrests** promotes freedom of movement, while a **padded and height-adjustable seat** ensures the right support.

The **structure in steel and reinforced plastic materials** guarantees durability, even in high-frequency professional environments.

Clinic technical stool without backrest, standing support medical stool, ergonomic seating for medical offices, adjustable stool with gas lift, fixed stool for healthcare use.
