

Clog rack for operating room h576_37

Clog rack in 18/10 AISI 304 stainless steel. Capacity: 28 pairs of clogs.

The **clog rack** is suitable for placement inside operating rooms, where it is essential to protect staff clogs from bacteria and excess liquids and, at the same time, it allows them to be always tidy and close at hand. It has a **vertical structure with a square section** with tubular support surfaces with a circular section, designed to avoid the accumulation of liquids and dirt. The **7 support shelves** are equipped with **double central support** and a **containment frame** for clogs. The **total capacity** of the structure is **28 pairs of clogs**.

Technical features:

- Length: 970 mm
- Depth: 260 mm
- Height: 1450 mm
- Made of 18/10 AISI 304 stainless steel
- Vertical structure with a square section
- 7 tubular support shelves with a circular section
- Double central support on each shelf
- Containment frame on each shelf
- Capacity: 28 pairs of clogs
