

Clog storage rack on wheels h740_19

Hospital clog trolley in AISI 304 stainless steel, capacity 36 pairs, double-sided on wheels. Aseptic structure for operating blocks.

The clog trolley **h740_19** is a professional equipment designed for the organization and storage of footwear within **operating blocks** and high-risk healthcare environments. The primary function of the device is to ensure orderly access to personal protective equipment, preventing direct contact between footwear and minimizing the risks of cross-contamination between different areas of the hospital complex.

Entirely made with a **square tube structure in AISI 304 stainless steel**, the trolley stands out for its double-sided configuration that optimizes operational space. The 6 supports are equipped with specific hooks and are completely **removable**, facilitating deep sanitation operations and flexible workflow management.

Technical features

- **Dimensions:** L 620 x W 625 x h 1396 mm
- **Material:** AISI 304 stainless steel (structure and hooks)
- **Configuration:** Double-sided structure for quick access
- **Capacity:** 36 pairs of clogs (6 shelves of 6 pairs each)
- **Hooks:** Distance between individual hooks of 320 mm to avoid overlapping
- **Mobility:** 4 antistatic wheels Ø 125 mm, 2 of which are equipped with pedal brakes
- **Protection:** Corner bumpers to preserve walls and structures
