

Clog trolley for operating room h640_26

Professional stainless steel clog trolley for operating rooms, 40-pair capacity, dimensions 110x50x165 cm, equipped with 4 wheels for mobility.

The **clog trolley h640_26** is a specialized logistical device, designed to meet the rigorous hygiene and organization requirements of **operating blocks** and hospital departments. The structure is entirely made of **stainless steel**, the preferred material for healthcare environments thanks to its natural resistance to corrosion and ease of deep sanitization, essential for preventing cross-contamination.

Technical features

- **Material:** high-resistance stainless steel
- **Storage capacity:** 40 pairs of clogs
- **Support system:** specific hooks for the orderly placement of footwear
- **Mobility:** 4 swivel castors for smooth movement on smooth surfaces
- **Total dimensions:** W.110 x D.50 x h.165 cm
- **Stability:** reinforced base to prevent tipping at full load
