

Clog trolley on wheels h576_36

AISI 304 stainless steel clog trolley for operating rooms, 7 shelves with capacity for 28 pairs, antistatic wheels and perimeter bumpers.

The **h576_36 clog trolley** represents an essential professional solution for the management and organization of footwear within operating blocks. Designed to meet rigorous hospital hygiene standards, this device allows for the orderly storage of staff footwear, preventing the formation of stagnant liquids and the accumulation of dirt thanks to its open geometry.

Entirely made of **18/10 AISI 304 stainless steel**, the trolley utilizes a mixed section tubular structure (square and circular) specifically designed to facilitate sanitization operations and ensure maximum durability in sterile or high-humidity environments.

Technical features

- **Material:** 18/10 AISI 304 stainless steel with professional finish.
- **Configuration:** 7 support shelves with double central support.
- **Footwear security:** Integrated containment frame on each individual shelf.
- **Total capacity:** Housing for 28 pairs of clogs.
- **Dimensions:** L. 970 x D. 580 x h. 1634 mm.
- **Movement system:** 4 non-marking polymer wheels (diameter 75 mm).
- **Operational safety:** 2 wheels equipped with parking brake and 2 antistatic wheels.
- **Protections:** 4 soft rubber perimeter bumpers to safeguard walls and furniture.
