

Clog trolley on wheels h740_16

AISI 304 stainless steel clog trolley for operating rooms. Capacity 18 pairs, antistatic wheels, removable supports, 620x515x1396 mm.

The h740_16 clog trolley is professional equipment designed specifically for the organization and storage of footwear within **operating blocks** and high bacteriological risk healthcare environments. The single-sided structure allows for optimal positioning along walls or in access corridors, ensuring order and speed during the medical staff's dressing phases. Entirely constructed of **AISI 304 stainless steel**, it ensures maximum resistance to corrosion and total compatibility with the strictest sanitization protocols.

Technical features

- **Dimensions:** W. 620 x D. 515 x h. 1396 mm
- **Configuration:** Single-sided for space optimization
- **Material:** High-thickness AISI 304 stainless steel square tube
- **Supports:** 3 removable stainless steel racks equipped with hooks
- **Functional distance:** 320 mm space between hooks to facilitate ventilation
- **Load capacity:** Housing for 18 pairs of clogs
- **Mobility:** 4 antistatic wheels Ø 125 mm, 2 of which are equipped with pedal brakes
