

Coffee cup collector h822_07

Professional metal container for coffee breaks, Ø40x70 cm. Optimizes the collection of cups up to 8 cm in diameter, reducing the volume by 60%.

The **cup and stirrer container** is a technical solution designed for the efficient organization of waste in break areas and refreshment points. It solves the problem of rapid filling of traditional bins caused by the volume of air between cups thrown in bulk. Thanks to a specific system of tubes integrated into the lid, the product guides the automatic stacking of cups, maximizing internal capacity and keeping the surrounding area clean and professional.

Technical features

- **Material:** High-resistance painted metal
- **Optimization system:** Internal tubes for guided stacking (up to 60% space saved)
- **Compatibility:** Cups with diameter up to 8 cm
- **Color:** Professional black
- **Dimensions:** Ø 40 cm x height 70 cm
- **Components:** Cup compartment, stirrer compartment, and general waste container
