

## Coffee/milk warmer with temperature regulator h1005\_08

Coffee/milk warmer with temperature regulator and round electric plate. Dimensions: 27 x 39 x h.70 cm. Capacity: 10 lt. Power: 120/240 W.

The **professional h1005\_08 coffee/milk warmer** is designed to offer **maximum functionality** and precision in **temperature regulation**, essential in professional environments such as **4 and 5-star hotels**.

With a capacity of **10 liters**, it is perfect for meeting the needs of large guest flows.

The structure is made of **shiny polished 18/10 AISI 304 stainless steel**, ensuring a highly resistant and easily sanitizable surface, ideal for maintaining high hygienic standards. The base is made of **stratified HPL** with a thickness of 1.2 cm, in **slate black color**, which ensures robustness and stability.

The variable power between **120 and 240 W** with **electric heating element power supply** allows to maintain the desired temperature constant, adapting to different operational needs.

The compact dimensions of **27 x 39 x h. 70 cm** allow for easy placement even in limited spaces, without sacrificing high performance. The device is also **complete with a round electric plate** to keep cups or accessory containers warm.

**Order the coffee/milk warmer with temperature regulator h1005\_08 now** and improve the hot beverage service in your hotel!

### Technical features:

- **Dimensions:** 27 x 39 x h. 70 cm
- **Capacity:** 10 liters
- **Power:** 120/240 W
- **Power supply:** electric heating element
- **Structure:** shiny polished 18/10 AISI 304 stainless steel
- **Base:** stratified HPL 1.2 cm thick, slate black color
- **Electric plate:** round plate included
- **Destination:** 4 and 5-star hotels

## Benefits for the user:

- **High capacity:** Ideal for managing large quantities of hot coffee or milk.
- **Temperature regulation:** Allows precise control for consistent beverage quality.
- **Resistant materials:** Easy-to-clean stainless steel and robust HPL base.
- **Heating plate:** Keeps cups warm for a perfect service every time.
- **Compact design:** Easily fits into even limited workspaces.

## FAQ:

### 1. What is the capacity of the coffee warmer?

It has a capacity of 10 liters, suitable for professional use.

### 2. How does the temperature regulator work?

The regulator allows you to keep the ideal temperature constant.

### 3. What material is the structure made of?

The structure is in shiny polished 18/10 AISI 304 stainless steel, to ensure resistance and ease of cleaning.

### 4. What are the dimensions of the coffee warmer?

It measures 27 cm in width, 39 cm in depth, and 70 cm in height.

### 5. For which environments is it recommended?

It is ideal for 4 and 5-star hotels that require reliable and high-performing equipment.

## Mini buying guide:

Choose a **professional coffee/milk warmer** with a **temperature regulator** if you want precise heat control to maintain the quality of your drinks. The **10-liter** capacity is perfect for hotels with a high flow of guests. The **18/10 stainless steel structure** ensures durability and ease of cleaning, while the **stratified HPL** base provides robustness and style. The integrated **round electric plate** is an added value for keeping cups warm, improving service. The compact dimensions make this coffee warmer easy to place in any work environment.
