

Coffin handling trolley h687_90

Professional coffin trolley in aluminum and stainless steel. Capacity: 300 kg, Ø 20 cm wheels and closed thickness of 13 cm. Made in Italy, silver finish.

The **coffin handling trolley h687_90** is a professional folding device, entirely **made in Italy**, designed for the support and safe transport of coffins. The structure combines an **aluminum frame**, which ensures lightness and maneuverability, with **stainless steel** joints and handles for prolonged mechanical resistance over time. This support solves the operational problem of transport in solemn contexts and storage in small spaces, thanks to a closing system that reduces the thickness to only **13 cm**. The use of lubricated nylon and teflon bushings ensures that the opening and closing phases are extremely precise and silent, a fundamental requirement for the target of funeral homes and cemetery operators.

Technical features

- **Open dimensions:** 118 x 73 x 60 cm
- **Folded dimensions:** 73 x 13 x 60 cm
- **Load capacity:** 300 kg
- **Materials:** Aluminum frame, stainless steel joints and handles
- **Mechanisms:** Lubricated nylon and teflon bushings
- **Wheels:** 20 cm diameter (Ø 200 mm)
- **Closed thickness:** 13 cm
- **Color:** Silver
- **Origin:** Made in Italy
