

Colored folding mat h999_31

Folding mat for nurseries (300x100x5 cm) in LD 30 foam and colored PVC coating. Space-saving and safe for psychomotor activities.

The **colored folding mat for nursery school h999_31** is a professional support designed for psychomotricity and children's gymnastics. Aimed at schools, sports centers and small gyms, it solves the need to quickly create a safe environment for walking, jumping and playing, protecting children during the development of motor skills. The modular and folding structure makes it particularly suitable for multi-purpose spaces that host different activities throughout the day, ensuring a minimal footprint when it must be stored. Made with an LD 30 foam core and a PVC coating, it ensures comfort, cushions falls and resists intensive use in school and recreational contexts.
