

Column protection for 100x100 mm h439_25

Impact protection for 100x100 mm posts, in 40 mm PE foam, velcro closure, yellow-black colors. Dimensions: W. 180 x D. 180 x h. 1000 mm.

The **industrial column protection h439_25** is the ideal solution for reducing the risk of accidental impacts in warehouses, workshops, loading areas, and production environments. Designed to cover and protect **100 x 100 mm posts**, this protection is made of **lightweight polyethylene (PE) foam** with a thickness of **40 mm**, capable of effectively absorbing impacts.

The high-visibility **yellow-black** finish also serves as a visual safety signal, reducing the risk of accidents in the workplace. Mounting is extremely simple thanks to the practical **velcro closure**, which allows you to install or remove the protection quickly without tools.

Standing **1000 mm** high, it is ideal for protecting the entire useful height of posts or columns in **indoor** environments. Its lightness allows it to be applied effortlessly and without compromising the stability of the structure it protects.

Perfect for those who want to increase safety quickly, economically, and without invasive interventions.

Protect the critical points of your work environment today! Order the h439_25 column protection now on Holity.com or request a personalized consultation.

Technical features:

- **Material:** Lightweight polyethylene (PE) foam
- **Thickness:** 40 mm
- **Color:** Yellow-black
- **Shape:** Rectangular
- **Compatibility:** 100 x 100 mm posts
- **Dimensions:** W 180 x D 180 x H 1000 mm
- **Net weight:** 1.45 kg
- **Assembly:** Velcro closure (no tools)
- **Application:** Indoor use
- **Supply:** Pre-assembled
- **Warranty:** 1 year

User benefits:

- **Shock absorption:** thanks to the 40 mm PE foam.
- **High visibility:** thanks to the yellow-black coloring.
- **Simple installation:** with velcro closure, no tools.
- **Lightweight and easy:** to position or remove.
- **Ideal for improving safety:** in industrial indoor environments.

FAQ:

1. **For what post dimensions is it suitable?**
For square posts 100 x 100 mm.
2. **Is it easy to install?**
Yes, thanks to the velcro closure, it can be installed without tools in seconds.
3. **Can it be used outdoors?**
No, it is designed exclusively for indoor environments.
4. **Does it need maintenance?**
No, just a simple periodic cleaning if necessary.
5. **Is it reusable?**
Yes, it can be removed and repositioned several times thanks to the velcro closure system.

Mini purchase guide:

When designing safe industrial spaces, it is essential to evaluate the areas most exposed to the risk of impacts and accidental contact. Columns and structural posts, especially in warehouses or logistics departments with personnel and vehicle traffic, represent one of the most critical points.

The **h439_25 column protection** is specifically designed for these contexts. Thanks to the **40 mm thick PE foam** material, it is able to cushion accidental impacts from forklifts, pallet jacks, or carts, reducing the risk of damage to the structure and injury to operators.

The **yellow-black coloring** is an additional strength, as it allows for visual signaling of risk zones, improving safety on pedestrian paths or in handling areas.

Being **lightweight, flexible, and pre-assembled**, it can be installed by anyone without tools, thanks to the **practical velcro closure**, which also makes it **easily removable and reusable**. It can be moved from one point to another according to operational needs, without leaving residues or requiring structural work.

It is ideal not only for warehouses, but also for **laboratories, workshops, depots, passing corridors, or production areas** where safety is a priority and space is limited.

Always evaluate compatibility with your post dimensions (100x100 mm) and ensure that the environment of use is **indoors**, as this protection is designed for **indoor use**.

If you are looking for a simple, visible, economical solution without structural interventions, the **h439_25** model represents a practical and immediate choice to improve the safety of your workspaces.
