

Commercial portable air cooler h958_04

Portable evaporative cooler for spaces up to 200 m². Dimensions: W 113 x D 72 x H 141 cm.

The **H958_04 portable cooler** is the definitive solution for cooling large production and commercial environments up to **200 m²**. Thanks to **evaporative** technology and a high airflow rate of **18000 m³/h**, it offers an ecological, economical, and healthy alternative to traditional air conditioning, ideal for workshops, marquees, terraces, restaurants, and commercial premises.

This device uses a natural process that utilizes recyclable materials such as **water, wood, and cardboard**, eliminating the need for harmful refrigerant gases like CFCs. This choice not only ensures effective and sustainable cooling, but also contributes to the reduction of **CO₂ emissions**, promoting responsible resource use.

The H958_04 is equipped with a powerful fan with a diameter of **760 mm**, which ensures a uniform and rapid distribution of fresh air. The **three adjustable speeds** allow the power to be adapted to different needs, maintaining a low sound level of **68 dB**, ideal for work and commercial environments.

The large **60-liter water tank**, combined with a consumption of **15 liters/hour**, offers a long operational autonomy, reducing the frequency of refills. The LCD control panel with remote control makes use practical and intuitive, allowing complete control of functions even from a distance.

Thanks to its portable design, the cooler can be easily moved between different areas, ensuring flexibility and practicality of use without the need for complex installations. It is the perfect choice for those who want a high-performance solution to improve thermal comfort in large environments.

Choose the **H958_04 cooler** to refresh large spaces efficiently and ecologically! With high performance and ease of use, it is the ideal solution for commercial and production environments. Buy now or request a personalized quote!

Technical specifications:

- **Airflow:** 18000 m³/h
- **Cooled area:** 200 m²
- **Water consumption:** 15 l/h
- **Tank capacity:** 60 liters
- **Fan diameter:** 760 mm
- **Sound level:** 68 dB
- **Speed:** 3 adjustable levels
- **Control panel:** LCD and remote control
- **Dimensions:** W 113 x D 72 x H 141 cm
- **Weight without water:** 62 kg

User benefits:

- **High performance:** Effectively cools environments up to 200 m².
- **Environmental sustainability:** Uses recyclable materials and does not use harmful gases.
- **Easy to use:** Intuitive control with LCD panel and remote control.

- **Quiet:** Ideal for work environments thanks to the low sound level.
- **Portable design:** No installation necessary, easy to move.

FAQ:

1. Which environments are suitable for the cooler?

It is perfect for large spaces up to 200 m², such as workshops, marquees, restaurants, and commercial premises.

2. Does it need to be installed?

No, the device is completely portable and ready to use. Just fill the water tank and connect it to the power supply.

3. How much water does it consume?

The consumption is 15 liters/hour, ensuring prolonged autonomy thanks to the large 60-liter tank.

4. How noisy is it?

With a maximum sound level of 68 dB, the cooler is designed to be quiet, ensuring a comfortable environment even in workspaces.

5. What maintenance is required?

Maintenance is minimal: simply clean the tank and filters periodically to ensure optimal operation.

Mini buying guide:

The **H958_04 cooler** is the ideal choice for those looking for a powerful and ecological device to cool large commercial and production environments. To ensure it meets your needs, consider some fundamental aspects.

First, evaluate the size of the area to be cooled. This model is designed for spaces up to **200 m²**, making it perfect for workshops, marquees, terraces, and large commercial premises. Its high airflow of **18000 m³/h** ensures uniform and effective cooling, even in environments with open doors and windows.

The **water consumption and autonomy** are elements to take into account. With a 60-liter tank and a consumption of 15 liters/hour, the H958_04 guarantees long hours of uninterrupted operation, reducing the need for frequent refills.

Another important advantage is **portability**: thanks to its compact design and integrated wheels, the cooler can be easily moved from one environment to another, offering great flexibility of use. It does not require any installation, which makes it an immediately ready-to-use solution.

Finally, the **LCD panel with remote control** ensures intuitive and remote control, allowing you to manage settings with ease. This cooler is ideal for those looking for a powerful, versatile, and environmentally friendly solution, capable of improving thermal comfort in large spaces without heavily impacting energy costs.

Evaporative cooler for large spaces, 200 m² industrial cooler, ecological cooling for production spaces, 18000 m³/h commercial portable cooler, cooler with LCD panel and remote control.
