

Concave road gully h638_41

Road gully in ductile iron with automatic closure and concave surface. External dimensions: 400 x 400 mm. Height: 55 mm.

The flat ductile iron road gully is an indispensable urban furnishing element to ensure citizen safety and to properly drain rainwater from the road to the sewage networks. The product features a **square frame** at both the seating base and the top corresponding to the road level, complete with **external perimeter flange, reinforcing ribs, shaped lugs** on the internal edge for locking the grate closure system, holes for grate hinging, **internal tabs** arranged at the four corners for the housing of an optional siphon.

The square grate is also equipped with parallel slots, a locking system, holes for hinging to the frame, a pair of nuts and bolts for hinging the grate to the frame and anti-slip reliefs.

Technical features:

- Material: ductile iron
- External dimensions: 400 X 400 mm
- Clear opening: 300 X 300 mm
- Height: 55 mm
- Drainage: 3.66 dm²
- Weight: 12.50 kg
- Anti-theft locking
- Hinge
- Automatic closure
- Trap-ready
- Concave surface (15 mm concavity)

INFORMATION

- Length in millimetres 400.000000
- Depth in millimetres 400.000000
- Height in millimetres 55.000000
