

Concave road gully h638_46

Concave rainwater gully with automatic closure and anti-theft locking. Dimensions: 600 x 600 mm.

The **road gully** is a fundamental urban furniture element to ensure **correct rainwater collection**, preventing it from accumulating on the road surface. At the same time, the product represents a **safety device** aimed at preventing cars and pedestrians from suffering damage due to the uneven road surface. The product features a **ductile iron structure** built **according to the UNI EN 124 standard** and consists of a **square-shaped frame** both at the base and at the top corresponding to the road level, and a square-shaped grating.

The frame is equipped with:

- Continuous external perimeter flange on all four sides
- Reinforcement ribs
- Shaped lugs on the inner edge for locking the grating closure system
- Holes for the grating hinge
- Internal tabs at the four corners designed for housing an optional siphon

The grating is equipped with:

- Parallel slots
- Closure system, unlockable with a generic lever
- Holes for the hinge to the frame
- Pair of nuts and bolts inserted to prevent theft and tampering
- Anti-slip surface

Technical features:

- Material: ductile iron UNI EN 124
- Siphonable
- Anti-theft locking
- Automatic closure
- Hinge
- External dimensions: 600 x 600 mm
- Clear opening: 500 x 500 mm
- Height: 83 mm
- Drainage area dm²: 11.33
- Weight: 39 kg
- Concavity: 8 mm

INFORMATION

- Length in millimetres 600.000000
- Depth in millimetres 600.000000
- Height in millimetres 83.000000
