

Concrete bollard for urban furniture h470_24

Concrete and lava stone bollard for urban furniture, Ø40xH85 cm, equipped with a ring for the delimitation and protection of public areas.

The **concrete bollard** with **lava stone** aggregates is a structural solution designed for the management of urban spaces and the protection of pedestrian areas. The combination of the cement binder and the mineral properties of the lava stone guarantees a highly robust product, capable of resisting the action of atmospheric agents and mechanical stress. The essential design makes it suitable for integration into historical and modern contexts, fulfilling the function of a visual and physical deterrent for vehicle traffic.

Technical features

- **Material:** high-strength concrete conglomerate
- **Finish:** exposed lava stone aggregates for a natural aesthetic
- **Dimensions:** diameter 40 cm, height 85 cm
- **Equipped with:** integrated top ring for fixing delimitation chains
- **Resistance:** solid high-density structure for maximum stability
