

Concrete dog waste bin h677_14

Concrete bin with natural mosaic for dog waste collection. Graphite grey metal lid with lock, internal galvanized bin. 30x30x70 cm, 15L.

The concrete bin represents an essential urban furniture element for public areas and parks frequented by pets. It allows for the hygienic disposal of dog waste, eliminating urban decorum issues and bad odors in municipal and city streets.

The structure is **made of concrete with a natural mosaic finish**, composed of natural marble or granite stones, available in **4 different color combinations**. The surfaces are treated with a **special protective coating** that reduces the accumulation of impurities and increases resistance to atmospheric agents and wear.

The **graphite grey RAL 7024 metal** lid is equipped with a **built-in lock and two access openings**. Internally, there is a removable **galvanized metal bin** for waste collection. The base is **designed for ground anchoring**, ensuring stability and safety in high-traffic public contexts.

Technical features

- Material: concrete with natural mosaic (marble or granite)
- Availability: 4 color combinations
- Protective coating for reduced impurity accumulation
- Lid: graphite grey RAL 7024 metal with lock
- Openings: 2
- Internal bin: galvanized metal (removable)
- Provision for ground anchoring
- Capacity: 15 liters
- Dimensions: L.30 x D.30 x H.70 cm
- Weight: 75 kg

Operational note: Goods unloading service is not included in the supply. A quote can be requested upon request and prior estimate.
