

Concrete fountain for urban furniture h287_356

Small urban furniture fountain in high-resistance concrete, Ø 52 x h 92 cm. Available in four material finishes for landscape integration.

Designed for the setup of public spaces and green areas, this **concrete fountain** represents a functional and durable solution for parks, squares, and gardens. The massive structure ensures high thermal inertia and stability, responding to the resistance requirements of the urban context and intensive use. Thanks to the variety of surface finishes, the product integrates harmoniously into both modern architectural contexts and historical redevelopment areas.

Technical features

- **Material:** High-density concrete
- **Available finishes:** White concrete, sandblasted effect, faux travertine, marble grit
- **Dimensions:** Ø 52 cm (base) x h 92 cm
- **Weight:** 130 kg
