

Concrete fountain for urban furniture h31909

Outdoor concrete fountain with suspended basin, Ø 59 x h 121 cm. Italian artisanal production with rounded edges for maximum safety.

This **outdoor fountain** represents a solution of excellence for urban and private furniture, combining the solidity of the material with the refinement of Italian artisanal production. Made of **high-resistance concrete**, the structure is designed to guarantee superior durability and excellent resilience against the degrading action of atmospheric agents and mechanical wear.

The design stands out for its **suspended basin**, an element that gives aesthetic lightness to the robustness of the central body, making it suitable for both modern contexts and historical environments. To ensure the highest safety standards in public places or those frequented by children, every edge has been carefully **sanded and rounded**, eliminating any surface roughness. The setup without taps included offers maximum design freedom, allowing the installation of specific components based on the technical and aesthetic needs of the client.

Technical features

- **Dimensions:** Ø 59 x h.121 cm
- **Material:** High-performance concrete
- **Configuration:** Structure with suspended basin

- **Weight:** Approximately 150 kg
- **Processing:** Manually sanded and rounded edges
- **Finishes:** Available in different color variants
- **Customization:** Taps not included for free configuration
- **Production:** Artisanal Made in Italy
