

Concrete litter bin for urban furniture h287_332

Concrete container for waste collection. Dimensions: Ø50 x h.70 cm. Capacity: 90 lt. Weight: 120 kg.

Waste bin for public spaces, ideal for furnishing gardens, parks, pine forests and seafronts. It consists of a sturdy **concrete structure**, equipped on the upper edge with a **decorative aluminum collar with engraving of the type of waste to be disposed of**. Upon request, it is possible to request this decorative element in **different colors based on the desired type of waste**, in this way ecological islands can be created by placing several bins side by side, each intended to receive a different type of waste. Given its weight, this container **does not require fixing to the ground**, but simply needs to be placed.
