

Concrete planter for public spaces h319_152

Square planter in white concrete 52.5 R with sandblasted/washed effect. Dimensions: W 98 x D 98 x H 104 cm. Weight: 990 kg. The **concrete planter H319_152 for public spaces** is an urban furniture element designed to combine **structural strength, aesthetic care and long-lasting functionality**. Its **imposing and impressive square shape**, combined with the **sandblasted/washed finish**, makes it an ideal choice for those wishing to furnish and delimit large outdoor areas with elegance and solidity.

Built with **white concrete 52.5 R** and surface-treated with a **sandblasted/washed effect finish**, the planter features a natural texture that recalls hand-worked stone, harmoniously adapting to both modern and classic contexts. The entire structure is **high-frequency vibrated**, a process that improves the compaction of the concrete and guarantees **maximum mechanical resistance over time**.

An important technical element is the **internal reinforcement with improved grip**, which strengthens the structure and makes it suitable even for environments subject to severe climatic conditions. Furthermore, the planter is treated with a **glossy anti-degradation water-repellent product**, designed to protect the material from infiltration, moss, atmospheric agents and dirt, keeping the aesthetic appearance unchanged over time.

With its **990 kg weight**, this planter does not require fixing or anchoring: it is naturally stable. All **corners are rounded**, for greater safety in high-traffic public spaces, such as parks, squares, schools or condominium areas. Handling is carried out using **suitable equipment**, during the installation or repositioning phase.

Choose the **H319_152 planter** to ensure elegance, safety and durability to your public spaces. Contact us for offers on large-scale projects or for custom solutions.

Technical features:

- **Material:** White concrete 52.5 R
- **External finish:** Sandblasted/washed effect
- **Internal structure:** Steel reinforcement with improved grip

- **Shape:** Square
- **Corners:** Rounded for greater safety
- **Handling:** Via suitable equipment
- **Dimensions:** W 98 x D 98 x H 104 cm
- **Weight:** 990 kg
- **Installation:** Direct placement on the ground

User benefits:

- **Maximum:** stability thanks to the weight of 990 kg.
- **Surface:** resistant to atmospheric agents and dirt.
- **Rounded corners:** for greater safety in public environments.
- **Finish:** high-quality natural stone effect.

- **Zero maintenance:** thanks to the water-repellent treatment.

FAQ:

1. **Does the planter resist rain and frost?**
Yes, thanks to the glossy anti-degradation water-repellent treatment and the 52.5 R concrete structure.
2. **How is the planter installed?**
It should be positioned on the ground using suitable means. It does not require fixing thanks to its high weight.
3. **Is it safe in public environments frequented by children?**
Yes, all corners are rounded, minimizing the risk of impact.
4. **Does the finish require maintenance?**
No, the anti-degradation treatment protects the surface and reduces the accumulation of dirt.
5. **Is it possible to move it once positioned?**
Yes, it can be handled with suitable equipment, thanks to its compact and solid structure.

Mini purchase guide:

If you are looking for a **robust urban planter with high aesthetic value**, the H319_152 model is the ideal choice.

Its **square shape and sandblasted/washed finish** make it perfect for large and institutional spaces, while its **high weight** guarantees stability without the need for anchoring.

The **glossy water-repellent** treatment allows you to keep it always clean and protected, even in difficult environmental conditions.

Furthermore, thanks to the **rounded corners**, it is safe even in environments frequented by families and children. Check the available space and choose an element that combines aesthetics, practicality and durability.
