

Concrete planter for urban furniture h319_54

Circular reinforced concrete planter Ø109 cm with copper decorative band, ideal for urban furniture and high-traffic public contexts.

Circular planter designed for the layout of public spaces, parks, and urban areas requiring furnishing components capable of combining **structural strength** and aesthetic refinement. The structure is made of **high-density concrete**, a material chosen to guarantee stability and durability in outdoor environments subject to atmospheric agents and mechanical stress. The design is embellished by a perimeter band in **copper-colored aluminum**, which gives a sophisticated profile to the product.

To facilitate logistics and installation operations, the interior is equipped with integrated **lifting hooks**, connected to an **internal reinforcement with improved adherence**. This configuration ensures that the product can be positioned in total safety despite the significant volumetric mass.

Technical features

- **Dimensions:** Ø109 x H67 cm
- **Weight:** 520 kg
- **Material:** Reinforced concrete with improved adherence reinforcement
- **Finish:** Decorative copper-colored aluminum band
- **Handling:** Internal hooks for lifting and positioning
- **Sustainability:** Product compliant with Minimum Environmental Criteria (CAM)
