

Concrete planter with decorative band h319_151

Oval planter with copper aluminium band. Dimensions: L 130 x D 60 x H 65 cm. Weight: 400 kg.

The **H319_151 concrete planter for public spaces** is an urban furniture element designed to combine **decorative aesthetics and structural solidity**, perfect for public environments such as squares, parks, pedestrian paths, institutional entrances, or historical centers. Its oval design stands out for the harmonious combination of **natural materials and decorative metal**, offering an elegant and contemporary visual impact.

This planter is made of **white concrete 52.5 R** with exposed **marble grit**, finished with a **sandblasted/washed effect**, which recalls the material appearance of natural stone. The surface is embellished with a copper-colored **aluminium decorative band**, a distinctive element that adds **aesthetic value** and modernity to the urban context in which it is placed.

Internally, the structure is **reinforced with high-adherence steel**, ensuring maximum mechanical resistance and durability even in outdoor environments subject to wear and weathering. The presence of **internal hooks** facilitates transport and positioning on-site, making installation simple and safe.

With a **length of 130 cm** and a **weight of 400 kg**, this planter is stable and self-supporting, ideal for high-traffic areas where **passive security** is required without the need for anchoring. It is a functional and decorative choice for municipal administrations, architectural firms, and public space managers.

Add a touch of elegance and resistance to your urban spaces with the **H319_151 planter**. Contact us for bespoke solutions and bulk supplies.

- **Aesthetics:** modern with a decorative metal band.
- **High stability:** thanks to the 400 kg weight.
- **Installation:** quick via pre-installed internal hooks.
- **Resistant:** to atmospheric agents and wear.
- **Surface:** natural decorative and durable over time.

FAQ:

1. **What material is the decorative band made of?**

The band is made of copper-colored aluminium, corrosion-resistant and suitable for outdoor use.

2. **Is the planter suitable for permanent urban furniture?**

Yes, it is designed for stable installation in high-traffic public environments.

3. **How is transport and positioning handled?**

Thanks to the pre-installed internal hooks, it can be easily moved using suitable equipment.

4. **Does it require anchoring work?**

No, thanks to the 400 kg weight, it is self-supporting and does not require ground anchoring.

5. **Is the concrete resistant to weathering?**

Yes, the 52.5 R white concrete and marble grit finish make it extremely resistant to rain, frost, and wear.

Short purchase guide:

When choosing a planter for public spaces, consider both aesthetic impact and structural performance.

The H319_151 planter is an ideal choice for those looking for **a decorative and resistant product**, thanks to the use of **premium materials such as concrete, marble grit, and aluminium**.

Its sandblasted/washed finish recalls natural stone, while the copper aluminium band adds a contemporary detail.

The high weight ensures **stability without the need for fixing**, and the **integrated hooks** facilitate positioning. It is perfect for public contexts, even where a design coordinated with other urban furniture elements is required.

Concrete planter with copper band, oval sandblasted urban planter, marble grit planter for outdoors, white concrete public planter, modern urban furniture planter.
