

Conference room bench h770_30

3-seater conference room bench, with orange red painted steel seats. Dimensions: 160.5 x 55 x h 76 cm.

The **h770_30 modular bench for conference rooms** represents an innovative and versatile solution for furnishing public and professional spaces. Thanks to its structure entirely made of **epoxy powder-coated steel**, this product guarantees long durability and resistance even in high-traffic environments, such as **offices, waiting rooms, railway stations, and airports**, as well as in more formal contexts like meeting or conference rooms. The design has been studied to combine aesthetics and functionality, with clean and essential lines that easily adapt to any environment, while the robustness of the materials ensures its solidity and resistance to wear over time.

One of the most interesting aspects of this bench is its **modularity**: the seats are configurable, allowing the number of places to be customized based on specific space and usage needs. This allows for the creation of standard compositions proposed by the company or for unleashing creativity by designing unique and tailored solutions for your spaces. The **steel monocoque** structure is made with folded edges that ensure extra resistance, while the **three-dimensional texture** created by the drawn holes not only gives visual lightness but also increases the rigidity of the bench, improving the comfort of the seats.

The **ergonomic seats** have been designed to ensure maximum comfort even for long waiting periods. This makes them ideal not only for public spaces like stations or airports but also for conference rooms or offices, where user comfort is essential. The perforated surface, in addition to giving a distinctive aesthetic effect, also facilitates ventilation, improving the user experience especially during hotter periods. Furthermore, the epoxy powder treatment guarantees a uniform and resistant coating that preserves the color and characteristics of the metal over time, preventing **corrosion** and wear due to frequent use or exposure to difficult environmental conditions.

Another strong point of this bench is the ease of **maintenance**. Thanks to the use of mono-material components, cleaning is quick and simple, a particularly advantageous aspect for highly frequented places like offices, waiting rooms, or commercial spaces. The bench also complies with the **minimum environmental criteria (MEC)**, a requirement increasingly requested in public tenders and projects that emphasize environmental sustainability.

In addition to solidity and design, the bench has been designed to ensure maximum safety. Construction details are designed to be **shockproof and accident-prevention**, minimizing risks for users even in high-traffic environments. The trestle bases, inspired by Leonardo's studies on self-supporting bridges, give the product exceptional stability without weighing down the structure. Furthermore, the fire reaction of the coating, less than 0.6 mm, attributes the **fire reaction class "0"** to the product, making it ideal also for installation in environments that require specific safety certifications.

This bench is available in **orange red (RAL 2002)**, a vibrant and contemporary color that fits elegantly into modern contexts. **Assembly** is quick and easy, thanks to the fastening system with **M6 screws** and **counterplates** that guarantee a stable and long-lasting installation. Every detail, from the shaped tubular steel supports to the design of the bases, has been studied to ensure a solid and durable configuration, without sacrificing the elegance of the forms.

In summary, the **modular bench for conference rooms** is an excellent choice for those looking for a furnishing solution that combines **aesthetics, functionality, resistance, and comfort**. It is particularly suitable for furnishing waiting spaces or common areas, both in work contexts and in high-traffic public environments, such as transport infrastructure or commercial spaces. If you are looking for a product that is resistant, easy to clean, customizable, and has a modern design, this bench represents an optimal solution for your space.

Technical features:

- **Material:** Steel structure with epoxy powder coating.
- **Dimensions:** 160.5 x 55 x h 76 cm.
- **Resistance:** Anti-corrosion treatment with phosphating.

- **Design:** Ergonomic seats with perforations that guarantee greater solidity.
- **Assembly:** Easy assembly with fastening via M6 screws and “U” bent counterplates.
- **Color:** Seats in orange red (RAL 2002), supports in metallic quartz gray.
- **Safety:** Shockproof and accident-prevention seats.
- **Regulation:** Complies with MEC (Minimum Environmental Criteria).

User benefits:

- **Guaranteed comfort:** Ergonomics designed for long waits.
- **Durability over time:** Resistance to corrosion and damage thanks to powder coating.
- **Versatility:** Suitable for various environments, indoors or outdoors.
- **Easy maintenance:** Simple cleaning thanks to the materials used.
- **Safety:** Designed to be shockproof and accident-prevention.

FAQ:

1. **Is it suitable for outdoor environments?**
Yes, the bench is made of painted steel, resistant to corrosion and weathering.
2. **Is it difficult to assemble?**
No, thanks to the fastening system with M6 screws, assembly is quick and simple.
3. **Is it possible to have color variants?**
Currently, the bench is available in orange red (RAL 2002) for the seats and metallic quartz gray for the supports.
4. **Is the bench ideal for qualifying or requalifying waiting spaces of any size?**
Yes, the bench is ideal thanks to its comfort and its formal lightness.

Mini buying guide:

When choosing a modular bench, always evaluate the available space and the number of seats required. For high-traffic environments, opt for resistant materials like painted steel, which guarantee durability over time and ease of cleaning. Also, check if the bench meets regulatory requirements such as **MEC**, essential for some public infrastructures.

Modular conference bench, steel bench for waiting rooms, 3-seater office bench, seating for public areas, ergonomic bench for conference rooms.
