

Conference room chair in recyclable polyamide h770_27

Conference room chair with black polyamide shell and technopolymer tablet. Dimensions: 59 x 55 x h 79 cm.

The **recyclable polyamide conference room chair h770_27** is designed to offer comfort and functionality in professional contexts such as meeting rooms and conferences. The **polyamide PA6 shell** reinforced with glass fiber is robust and resistant, characterized by a special **filigree finish** that gives the surface a three-dimensional effect and a pleasant touch. The black color makes it sober and elegant, suitable for modern and formal spaces.

The structure consists of **4 chrome-plated steel legs** with a diameter of 16 mm, welded to U-section steel upper plates, with holes for fixing the shell and predisposition for the addition of accessories. An available accessory is the **armrest tablet** made of **black technopolymer**, with a polished aluminum **anti-panic joint** that allows it to be easily folded if necessary. The tablet is mounted using screws on the Ø 16 mm steel leg structure.

The **technopolymer** feet protect delicate surfaces, making the chair ideal even for wooden or tiled floors. Assembly is quick and easy thanks to the **4 screws** that fix the shell to the structure, using pre-inserted threaded metal bushings.

Discover the comfort and functionality of our **conference chair with integrated tablet h770_27**. Request a personalized quote now!
