

Conference room chair with two armrests and writing tablet h1038_20

Conference chair with double armrests and writing tablet, polypropylene shell and steel frame. Dimensions W 60 x D 70 x H 80 cm.

The **h1038_20 conference room chair** is a complete study station, designed to offer maximum operational comfort in high-level training contexts. This model integrates an injection-molded **polypropylene shell** with a solid **semi-oval steel tube** structure painted with epoxy powders. The peculiarity of the configuration lies in the presence of **two nylon armrests** and an integrated **black writing tablet**, solving the operational problem of bilateral postural support combined with the need for a stable support surface. It is the ideal solution for professional and school targets requiring ergonomic and functional fixed workstations.
