

Connectable hex-round desk for nursery school h908_155

Modular wave-shaped didactic table for nursery school, steel structure Ø40mm, H53cm. Connectable hex-round shape for collaborative work islands.

The **H908_155 desk** is a technical-educational furnishing solution designed for nursery school classrooms that require high spatial flexibility. The peculiar **wave hex-round geometry** allows overcoming the rigidity of traditional desks, enabling the aggregation of multiple modules to form circular islands, sinuous compositions, or integrated group stations. This system actively supports cooperative learning and rapid classroom reconfiguration based on the pedagogical needs of the moment.

The construction is based on a solid **40 mm steel tube** frame with an aluminum finish, balancing structural stability and ease of movement. The ivory-toned work surface is designed to ensure a low reflectance index, improving children's visual comfort during prolonged activities.

Technical features

- **Type:** modular connectable table for school environment.
- **Shape:** wave hex-round for multiple configurations.
- **Dimensions:** 120 x 60 cm.
- **Height:** 53 cm (Size 2 according to EN 1729).
- **Structure:** Ø 40 mm powder-coated steel tubular in aluminum color.
- **Top:** anti-reflective ivory-colored melamine.
- **Safety:** rounded edges and corners for accident prevention.

Optional available: it is possible to request customized top colors according to the sample book for specific color projects.
