

Construction barrier h632_05

Delimitation barrier for public spaces. With reflective strip. Dimensions: L200 x H110 cm.

Road barrier ideal for identifying construction areas or delimiting zones for markets, parades, fairs. Made of **hot-dip galvanized iron**, robust, stable and easy to transport. Thanks to the side hooks, it can be combined with other barriers to form different compositions based on needs. Equipped with a **reflective strip** to ensure maximum visibility even at night. **Swivel feet**.

Technical features:

- Dimensions: L200 x H110 cm
- Weight: 13.50 kg
- Structure made of 32 mm x 1.2 mm perimeter tubular and 8 mm vertical rods
- Material: hot-dip galvanized iron according to UNI standards
- With 150 x 20 cm reflective strip available single-sided or double-sided (choose during the ordering phase)
- Swivel feet
