

Construction cone h632_08

PVC traffic cone. Height: 54 cm. With white and red reflective bands.

Signaling cone ideal as a traffic separator and for the delimitation of areas dedicated to road works. Made of **soft PVC** and covered in red and white tear-resistant fabric, completely **reflective**, perfect for ensuring maximum visibility both day and night. The material used guarantees **excellent flexibility, non-deformability, and resistance to impacts and atmospheric changes**. The base has a weight that ensures **stability**, but at the same time practicality in movement.

Technical features:

- Height: 54 cm
- Material: soft PVC
- With tear-resistant fabric with white and red reflective bands CLASS 2

INFORMATION

- Height in millimetres 540.000000
