

Construction site barrier h632_38

Mobile plastic barrier. Dimensions: W. 207.50 x D. 110 cm. With robust and stable hooking system.

Road barrier ideal for use in construction sites or for managing queues and crowds of people during fairs and events. The barrier features a quick, robust, and stable **hooking system** that allows the creation of infinite perimeter shapes, even curved ones, even on uneven surfaces. The barrier is prepared for the **fixing of lighting devices** on the special lamp holder hooks and is made of HD-PE resistant to impacts and mechanical stress. The structure is white and complete with a double white/red band in class I reflective film in both the upper and lower parts for better visibility.

Technical Features:

- Material: Resistant HD-PE
- Resistant to UV rays, salt spray, low and high temperatures
- Rust-resistant and washable
- Adjustable feet
- **Does not conduct electricity**
- Dimensions: W. 207.50 x D. 110 cm

INFORMATION

- **Material** plastica
- **advantages** con catarifrangente
- **Length in millimetres** 2075.000000
- **Height in millimetres** 1100.000000
