

Construction site cone with belt h972_132

Professional signaling cone in PVC and ABS with a 4-meter retractable belt and ballastable base for the safe delimitation of work areas.

The **construction site cone with belt h972_132** is a professional signaling system designed for the immediate and safe delimitation of operational areas, danger zones, and temporarily inaccessible spaces. Made with a combination of **PVC and ABS**, the device guarantees high resistance to mechanical impacts and degradation caused by atmospheric agents, making it suitable for intensive use in industrial and construction contexts.

The structure is equipped with a **ballastable base** which, when filled with water or sand, reaches a weight of 7.30 kg, providing the necessary stability to operate on irregular surfaces or in the presence of wind. The integration of a **4-meter retractable belt** in high-resistance polyester, characterized by a high-visibility yellow/black livery, allows for the creation of effective physical and visual barriers. Safety is further increased by the **braking and anti-panic system**, which ensures the automatic release of the strap in case of emergency, facilitating evacuation operations without creating obstructions.

Technical features

- **Total height:** 1050 mm
- **Base dimensions:** 550 x 550 mm
- **Structure material:** PVC / ABS
- **Strap material:** High-resistance polyester
- **Strap length:** 4 m
- **Strap width:** 50 mm
- **Cone color:** Yellow
- **Strap color:** Black / Yellow / Black striped graphics
- **Total weight:** 7.30 kg (with ballasted base)
- **Ballastable base:** Designed for filling with water or sand
- **Safety system:** Braking mechanism with anti-panic release
- **Roller capacity:** Integrated for the insertion of up to 3 straps
- **Upper interface:** Threaded hole for fixing information panels
- **Protection grade:** Waterproof casing for internal mechanisms
- **Intended use:** Outdoor and industrial environments
