

## Container for cup and stirrer collection h1025\_25

100L steel container for cups and stirrers (38x38x82 cm), ideal for break areas with 7 dedicated holes and magnetic signage included.

The **H1025\_25** container is a professional solution designed for the optimized management of waste from vending machines. Developed for high-traffic interiors, this system allows for the effective separation of **disposable cups and stirrers**, improving order and hygiene in common areas such as **offices, canteens, hospitals, and schools**.

The structure, entirely made of **steel**, ensures high mechanical resistance and a long operational life, even in contexts subject to intensive use. The compact design integrates a specific perforated head that guides the user in correct disposal, reducing waste volume and facilitating recycling.

## Technical features

- **Material:** Steel with resistant finish
- **Volumetric capacity:** 100 liters
- **Head configuration:** 7 holes for cups and 1 hole for stirrers
- **Emptying system:** Top access with internal bag holder ring
- **Dimensions:** W 38.3 x D 38.3 x H 82.5 cm
- **Weight:** 11.5 kg
- **Signage:** Removable magnetic pictogram included
- **Compatibility:** For indoor use only
