

Container for expired medicines 90lt - h32625

Container for collecting expired medicines with an anti-intrusion lid and a metal base for floor mounting. Capacity 90lt.

The container for collecting medicines is very **resistant to impact and weather** as it is made of polyethylene using the particular rotational molding technique.

Medicines are easily inserted through an **anti-intrusion door**, with dimensions of 19x19 H.20 cm, located on the lid.

The container **can be fixed to the ground** using a metal base with 2 side holes.

It can be emptied with a bag or by means of a removable internal container, also made of plastic.

It has a suitable thickness to ensure the operator's total safety during the emptying operation, especially if syringes were carelessly introduced, as the structure does not allow needles to escape.

FEATURES AND MINIMUM MEASUREMENTS

- container capacity approx. 90 lt.
- height from the ground approx. 100 cm
- lid dimensions approx. 47x32 cm
- anti-intrusion lid dimensions approx. 19x19 H.20 cm
- max depth approx. 40 cm
- metal base dimensions approx. 48.5 x 37 cm
- metal base weight approx. 5.00 kg
- total weight approx. 10 kg

INFORMATION

- **Capacity** 90 lt
- **Height in millimeters** 1000.000000
- **Width in millimeters** 485.000000
- **Depth in millimeters** 400.000000
