

## Container for small cups and stirrers h822\_06

Black metal container Ø40x70 cm for coffee cups up to Ø8 cm, with a tube system for automatic stacking and volumetric savings.

The **coffee cup container** is a technical solution designed to optimize waste management in break areas, conference rooms, and corporate refreshment points. Thanks to the guided insertion system via tubes fixed to the lid, the device facilitates the orderly disposal of cups and stirrers, solving the problem of excessive bulk in traditional bins. The mechanism allows for **automatic stacking** of empties, reducing waste volume by up to 60% and minimizing the frequency of emptying interventions by cleaning staff.

## Technical specifications

- **Material:** High-resistance painted metal
- **Color:** Anti-reflective black
- **Compatibility:** Suitable for cups with a maximum diameter of 8 cm
- **Dimensions:** Ø 40 cm x height 70 cm
- **Collection system:** Internal tubes for guided vertical stacking

*Image purely indicative*

## INFORMATION

- **Diameter** 400.000000
- **Height in millimeters** 700.000000
