

Container for T/F collection, 70 lt h140_306

T/F toxic and harmful waste container in galvanized sheet metal with anti-intrusion lid. Capacity: 70 liters.

Bin for special, toxic and flammable waste, for urban furniture. Structure composed of a support post in galvanized steel round tube adorned at the top by a decorative frieze and at the bottom by a galvanized steel flange with the function of covering the hole made for the underground installation. Cylindrical container made of galvanized sheet metal, the body consists, in the lower part, of a shaped bottom in galvanized sheet metal and a lid, while the central part is made of galvanized sheet metal. A hinge connects the lid to the body, while a push-button lock with a single-coded key, allows the lid to be opened and the container to be extracted. Inside there is a PVC container intended for waste collection. Externally, a plate indicating the type of waste it can hold is clearly visible. Waste introduction occurs by pushing down the flap located in the upper part, which is equipped with a spring that will ensure its automatic return to the closed position. The painting technique adopted for the galvanized steel structure is thermosetting powder coating with oven baking.

Technical characteristics:

- Galvanized sheet metal material
- Internal PVC container
- Capacity: approximately 70 liters
- Height from the ground: 130 cm
- Dimensions: 35x55x h.130 cm
