

## Dog waste container h22101

Dog waste container in galvanized steel with integrated bag dispenser, 60-liter capacity, wall or ground installation, with washable internal bucket.

Specific container for the separate collection and distribution of dog waste bags in public spaces and common areas. Made of **galvanized steel sheet** and externally painted with oven-dried powders, it ensures long-lasting protection against atmospheric agents. Designed with a rectangular body, sloped anti-rain roof, and recessed front door that facilitates access for emptying and maintenance.

The system combines an **internal dispenser for hygienic tear-off bags** with a removable, washable, and disinfectable **internal plastic bucket**. The bucket is compatible with universal interchangeable internal liners. Two **universal key locks** guarantee security against unauthorized access. A **pre-cut self-adhesive label** with a dog pictogram clearly identifies the type of waste.

## Technical characteristics

- Material: powder-coated galvanized steel sheet
- Capacity: 60 liters
- Height: 680 mm (roof) / 590 mm (body)
- Width: 270 mm (body) / 310 mm (roof)
- Length: 430 mm
