

Corner guards for nursery schools h703_04

150 cm expanded polyethylene corner guard, non-toxic and fire-retardant. Ideal for safety in schools, 10 mm thickness and glue installation.

This **corner protection** in expanded polyethylene is specifically designed to ensure children's safety within educational and recreational contexts. Its shock-absorbing structure allows it to effectively absorb accidental impacts, transforming sharp corners into safe surfaces. Thanks to the properties of closed-cell polyethylene, the product is **non-toxic, fire-retardant and totally waterproof**, making it suitable for both indoor installations and outdoor play areas.

Technical characteristics

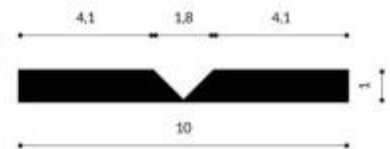

- **Material:** high absorption capacity expanded polyethylene
- **Safety:** non-toxic and fire-retardant material
- **Waterproofing:** resistant to oils, basic acids and liquids
- **Environment of use:** suitable for outdoor and indoor applications
- **Thickness:** 10 mm
- **External width:** 5 + 5 cm
- **Height:** 150 cm
- **Finish:** smooth surface
- **Regulatory compliance:** certified according to UNI EN 71-3 and UNI EN 913
- **Colors:** available in different chromatic variants
- **Installation:** application using special quick-setting adhesive
