

Corner protector for kindergartens h703_01

Corner protection in recycled expanded polyethylene, 100x5x5 cm. Fireproof and non-toxic, designed for impact safety in school environments.

The professional **corner protection** is specifically designed for the layout of kindergartens, nurseries, and playrooms, where passive safety is a fundamental requirement. Thanks to the **recycled expanded polyethylene** structure, this profile is able to effectively absorb impacts from accidental pushes or falls, minimizing the risk of injuries for children. The material used is **non-toxic and fireproof**, ensuring maximum compatibility with the hygiene and fire prevention standards required in high-traffic public and private children's spaces.

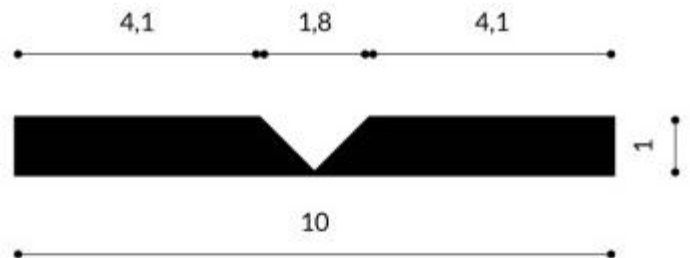

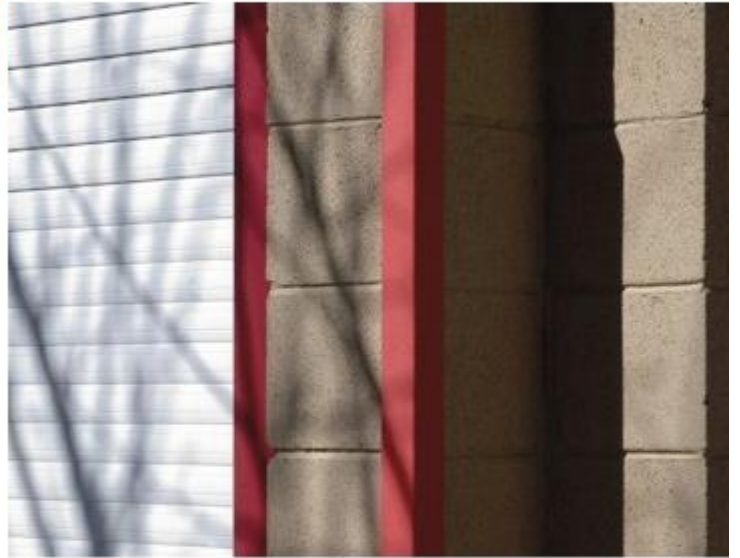

Technical characteristics

- **Material:** non-toxic recycled expanded polyethylene
- **Reaction to fire:** fireproof class I
- **Thickness:** 10 mm
- **External section:** 5 + 5 cm
- **Internal section:** 4.1 + 4.1 cm
- **Length:** 100 cm
- **Regulatory compliance:** UNI EN 71-3 (safety of toys - migration of elements) and UNI EN 913 (gymnastic equipment - safety requirements)
- **Colours:** wide range of bright colours for architectural integration
- **Maintenance:** quick cleaning with neutral detergents and a damp cloth
