

Corner walking parallel bars h581_43

Corner parallel bars with steel handrails for rehabilitation. Length of the 2 walking platforms: 200 - 270 cm.

The **corner parallel bars** with **steel handrails** are ideal for carrying out rehabilitation paths for the elderly or patients who have undergone surgery and need to regain independent walking. The **anatomically shaped handrails** are **adjustable**, via clamping levers, **both in height and width**. The **two walking platforms**, respectively **270 and 200 cm long**, are **covered with non-slip material** and feature **access ramps** that facilitate entry to the platforms.

Technical features:

- Corner shape
- Frame material: painted steel
- Length of the two walking platforms: 200 - 270 cm
- Base width: 70 cm
- Walking platform width: 59 cm
- The walking platforms are covered in non-slip material
- Anatomically shaped handrails adjustable in height and width
- Handrail height adjustment: 65 - 100 cm
- Load capacity per single handrail: 135 kg
- Declaration of conformity
