

Cover for above-ground pools in woven polypropylene diameter 600 cm h17432

Universal coverage for above-ground pools circular with a diameter of 6 meters in woven polypropylene, suitable for all seasons

Universal coverage for above-ground pools of circular shape with a maximum diameter of 6 meters.

The use of the cover is very important even in summer because the water protects from dust, insects and foreign substances, also reduces the dispersion of heat that is accumulated during the day. The cover is made of woven polypropylene, synthetic water-repellent resistant to abrasion, wear, washing and chemical agents with high insulation capacity. The polypropylene can be recycled to 100%.

The frequent use of the cover allows to reduce the quantities of the products needed to maintain this the pool clean and to decrease the time required for water filtration.

Practical and easy to fit thanks to the elastic or to the eyelets on the board.

Specifications:

- Product made in Italy
- polypropylene fabric
- Circular
- diameter of 6 meters
- for above-ground pools
- used for swimming pools with maximum dimensions of 6 meters in diameter
- ideal year round
