

Crate trolley load capacity 100 kg h286_49

Monobloc steel sheet trolley for goods transport, load capacity 100 kg, wheels $\varnothing$ 150 mm, dimensions 42x105 cm, RAL 3000 red finish.

The **monobloc transport trolley** is a professional solution designed for the manual handling of crates, packages, boxes and bulky goods in logistical and operational contexts. Made entirely of **steel sheet**, this support guarantees superior structural stability thanks to the monobloc configuration, which eliminates the typical weak points of assembled or folding structures. The surface finish is obtained through **oven-baked powder coating** in RAL 3000 red, a treatment that ensures effective protection against wear and external agents.

Technical features

- **Dimensions:** W. 42 x h. 105 cm
- **Material:** steel sheet
- **Color:** RAL 3000 red
- **Capacity:** approx. 100 kg
- **Handling system:** on wheels
- **Wheel diameter:** 150 mm
- **Configuration:** monobloc model
- **Surface treatment:** oven-baked powder coating
