

Crate trolley load capacity 60 kg h1035_11

Folding aluminum stair-climbing trolley, 60 kg capacity. Ultra-compact structure (630x373 mm folded) for agile movement on stairs.

The **h1035_11 crate trolley** is a professional tool designed to optimize micro-logistics operations and last-mile deliveries. Thanks to its technical configuration, it solves the critical issues related to handling loads on stairs and uneven surfaces in buildings without elevators, offering reliable support to couriers, technicians, and commercial operators. The structure is made entirely of **aluminum**, a choice that gives the product exceptional operational lightness without compromising the structural stability necessary for transporting packages up to 60 kg.

The distinctive feature of this model is its advanced folding system: once folded, the trolley drastically reduces its size, facilitating storage within saturated cargo areas or in the trunks of private cars. The **non-marking gray rubber wheels** ensure constant traction and smooth progression, protecting the most delicate surfaces from marks or abrasions during transit.

Technical specifications

- **Type:** Folding stair-climbing trolley
- **Frame material:** High-strength lightweight aluminum
- **Load capacity:** 60 kg
- **Total measurements (open):** 1,000 x 373 mm
- **Load platform dimensions:** 415 x 217 mm
- **Wheel diameter:** 50 mm
- **Wheel material:** Non-marking gray rubber
- **Folded dimensions (minimum footprint):** 630 x 373 mm
