- **Durable materials:** galvanized and painted steel for long-lasting resistance.
- **Secure fixing:** base prepared for greater stability.
- **Customizable finish:** more color options available.
- **Perfect for every context:** from public spaces to private gardens.

FAQ:

1. Is the planter also suitable for indoor environments?

Yes, it can be used both indoors and outdoors, thanks to its essential design and resistant finish.

2. Which plants can be inserted?

It is ideal for ornamental plants, seasonal flowers, and small shrubs, thanks to its cubic shape and the stability of the structure.

3. Is it also suitable for commercial or urban environments?

Absolutely yes, the planter is designed to integrate perfectly into public, commercial, and residential contexts.

4. What is the thickness of the external sheet?

The external sheet is made of laser-processed galvanized and painted steel, designed to offer solidity and lightness.

5. How do you clean the external surface?

Simply use a soft cloth and neutral non-abrasive detergents to keep the paint in excellent condition.

Mini buying guide:

The **cube planter h330_37** is an excellent choice for those who want an elegant and robust outdoor furnishing accessory. Its **galvanized steel structure, squared design** and the possibility of **choosing the color of the base** among the available colors make it perfect for a wide range of settings, from **private gardens** to **public urban spaces**.

The **pre-drilled fixing at the base** guarantees safety even in exposed areas, while the **RAL 9010 finish of the external sheet** gives a contemporary touch that is easily combined with other architectural elements.

Steel cubic planter, RAL 9010 white planter, laser-cut outdoor planter, floor-fixed planter, modern galvanized painted planter, planter for terraces and public spaces.
