

Cutlery and tray trolley h519_15

Professional **tray and cutlery trolley** with a hybrid **wood and metal** structure. Equipped with an integrated dispenser for **300 napkins** and an upper cutlery compartment. Elegant and functional design, ideal for self-service areas, motorway service stations, and hotels seeking order and style in a single product.

The **cutlery and tray trolley** is a complete service station, designed to optimize flow management in self-service areas of motorway service stations, fast food outlets, diners, and breakfast rooms. Its structure combines the solidity of **metal profiles** with the warm aesthetics of **wooden side panels**, making it a discreet and professional furnishing element that integrates perfectly into any room.

This model is extremely functional: the upper part houses a practical cutlery compartment and a **napkin dispenser** with a capacity of 300 units (9x13 cm format). The lower compartment is sized for the orderly storage of trays. Thanks to the 4 swivel wheels, two of which are equipped with brakes, the trolley can be moved with ease for cleaning or restocking operations, always ensuring maximum stability during use.
