

Cylinder transport trolley h55_93

Hospital trolley for 40/50 l oxygen cylinders, steel structure, solid rubber wheels Ø200mm, ergonomic handle, safety chain, load capacity 100kg.

Trolley specifically designed for the **safe transport of oxygen cylinders** in hospital and industrial contexts. The robust steel structure combines maneuverability and stability, ensuring smooth handling even on different surfaces (asphalt, stoneware, concrete, resin). Ideal for intensive care units, operating rooms, emergency environments, and technical gas distribution plants where rapid and safe cylinder management is critical.

Technical characteristics

- **Dimensions:** W. 44 × D. 40 × h. 125 cm
- **Loading plate:** 32 × 22 cm
- **Self weight:** 11 kg
- **Maximum capacity:** 100 kg
- **Cylinder compatibility:** 40/50 liters, maximum diameter 260 mm
- **Wheels:** 2 solid rubber wheels Ø 200 mm, black rubber ring, hardness 82±4 Sh.A
- **Central bar:** for stability and support during handling
- **Handle:** ergonomic grip at useful height
- **Fixing system:** red safety chain
- **Finish:** blue RAL 5015

- **Compliance:** CE marking
