

Cylindrical umbrella stand h20_204

Cylindrical umbrella stand in black painted metal with internal tray and rubber base. Dual function as a waste paper bin, professional design.

The **cylindrical umbrella stand** is an essential furnishing accessory for organizing entrances in professional, commercial, and executive contexts. Made of **epoxy powder-coated metal**, it guarantees high mechanical resistance and a long-lasting finish. The structure is designed for maximum functionality: it includes an **internal plastic tray** dedicated to collecting rainwater, preserving the integrity of the floors, and a non-slip **rubber base** that protects delicate surfaces. The versatility of the design allows for alternative use as a practical waste paper bin for offices and waiting rooms.

Technical features

- Material: high-resistance metal
- Finish: epoxy powder coating
- Color: black
- Accessories included: internal plastic drip tray
- Base: protective and non-slip rubber coating
- Design: multifunctional cylindrical
