

Deck-mounted liquid soap dispenser h218_252

Deck-mounted dispenser h218_252 in brass (150x34x116 mm) with laser sensor and electric power supply. 1500 ml refillable tank.

The **Deck-mounted liquid soap dispenser h218_252** is an automatic deck-mounted device developed for installation on washbasins or countertops. This technical furnishing component resolves the operational criticality of manual contact and cross-contamination in restrooms, allowing for automatic touchless dispensing. Aimed at a professional target of managers of hospitality facilities, offices, and public spaces, the dispenser is suitable for high-frequency use areas with high hygiene requirements. The body is made of chrome-plated cast brass according to the EN248 standard, integrated with internal plastic components (POM and ABS) in a robust and vandal-proof structure available in different colors. Operation is managed exclusively with an electric power supply (220 V, 50/60 Hz - AC 220V - 50/60Hz / DC6V). Dispensing occurs by placing hands under the distributor within the laser sensor detection range (from 5 to 23 cm); the dispenser activates automatically and remains in operation as long as the hands stay within range, with an adjustable maximum operating time. The refillable tank offers a capacity of 1500 ml and is suitable for liquid soap or hand sanitizer (7.5%) with viscosity between 100 and 3800 cPs, releasing a standard soap discharge of 1 ml (adjustable). The device dimensions are 150 mm in height, 34 mm in width, and 116 mm in depth (150 x 34 x 116 mm). The dispenser is supplied with fixing elements and all necessary accessories for installation. For maintenance, the use of pH-neutral soap and water with drying by a clean cloth is recommended, taking care to protect the dispenser from splashes when cleaning the bathroom with aggressive products.

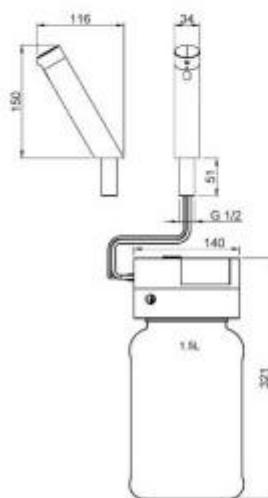

Technical features

- **Type:** Automatic deck-mounted liquid soap dispenser (washbasin or countertop mounting)
- **Body material:** Brass (chrome-plated cast brass according to EN248 standard)
- **Component material:** Plastic components (POM and ABS)
- **Color variants:** Available in different colors
- **Actuation:** Integrated laser sensor
- **Power supply:** Exclusively electric current (220 V, 50/60 Hz - AC 220V - 50/60Hz / DC6V)
- **Sensor detection range:** From 5 to 23 cm
- **Capacity:** 1500 ml (refillable)
- **Standard soap discharge:** 1 ml, adjustable
- **Allowed soap viscosity:** 100-3800 cPs
- **Detergent compatibility:** Liquid soap or hand sanitizer (7.5%)
- **Dimensions (H x W x D):** 150 x 34 x 116 mm
- **Standby consumption:**

- Height in millimetres 1500.000000
- Capacity 1500 ml
- strengths per sapone liquido
- Width in millimetres 340.000000
- Depth in millimetres 1160.000000
- supply electric
