

Defibrillator cabinet with alarm h104306

Protective cabinet h104306 for AED defibrillator in White RAL 9010 galvanized P02 carbon steel. Dimensions: W 42.5 x D 42.5 x H 18 cm, equipped with windowed door.

The **defibrillator cabinet h104306** is an advanced security case, designed to protect AED devices and prevent unauthorized removals thanks to an integrated security system. Entirely made of **galvanized P02 carbon steel sheet**, the structure is treated with epoxy-polyester powder coating in **White RAL 9010** and baked in a thermal tunnel at 180°C for maximum resistance. The model features a windowed door for immediate visual inspection, hinges with a galvanized pin for full 180° opening, and an internal hook for hanging the defibrillator. The peculiarity of this version lies in the **surveillance device with a 100 dB magnetic sound alarm** positioned on the door; powered by 3 LR44 button batteries and CE approved, the alarm activates in case of forced opening and can be managed (arming and disarming) via a dedicated numeric keypad.

Technical features

- **Frame material:** Galvanized P02 carbon steel sheet
- **External finish:** White RAL 9010 epoxy-polyester powder coating, baked at 180°C
- **External dimensions of the cabinet:** 425 x 180 x 425 (WxDxH) mm
- **Total weight:** 6.8 kg
- **Configuration:** 1 windowed door with galvanized pin hinges (180° opening)
- **Internal setup:** Hook for hanging the defibrillator
- **Mechanical closure:** Padlockable seal closure in nickel-plated zamak
- **Security system:** Surveillance device with magnetic sensor sound alarm
- **Alarm acoustic power:** 100 dB
- **Alarm management:** Numeric keypad on the alarm body for arming and disarming via code
- **Siren power supply:** 3 button batteries type "LR44"
- **Alarm module dimensions:** 85 x 46 x 9 (WxHxD) mm
- **Alarm certifications:** CE approval
- **Visual signage:** AED signage sticker included on the cabinet
