

Delimitation barrier h287_128

Galvanized steel pedestrian barrier for in-ground mounting. Dimensions: W100 x H120 cm

Pedestrian barrier **for delimiting public spaces** such as pedestrian areas, parks, avenues. To be buried in the ground by 20 cm. Built with 2 **galvanized steel** uprights with a diameter of 42 mm and 2 horizontal rails with a diameter of 33 mm. With cast aluminum junction elements that, together with the two spheres at the ends of the vertical uprights, constitute decorative elements for the structure. The steel parts undergo a **pre-treatment process for degreasing impurities** through solutions and vapors, then they are dried and painted, covering the pieces **with non-toxic powders** according to current regulations; finally, they undergo **oven polymerization** in order to allow the powder to solidify.

Technical features:

- Dimensions: W100 x H120 cm
- Material: galvanized steel and cast aluminum
- Fixing: to be buried by 20 cm
