

Dentist stool h784_10

Stool with backrest for dental clinics. Height adjustable from 44 to 57 cm via gas lift control lever. Available in multiple colors.

Stool for medical use, particularly suitable for the dental sector. Consisting of a super-resistant **stainless steel frame**, equipped with a **5-star base with double wheels** to allow for easy and safe movement. The shell, which includes seat and backrest, features **soft padding and a super resistant and easy-to-clean upholstery**. The seat is **height-adjustable** thanks to the gas piston that can be operated manually with a lever; furthermore, it is also possible to individually adjust **the backrest inclination**.

Technical features:

- Stainless steel frame
- 5-star base with double swivel wheels
- Padded and upholstered seat and backrest
- Height-adjustable seat 44-57 cm via gas spring with manual control lever
- Individually adjustable backrest inclination
- Available in multiple colors

***Other colors are available upon request*
