

Dentist work stool h784_12

Dental stool with backrest. Stainless steel frame. Height adjustable from 51 to 70 cm.

Stool for medical use, ideal for equipping dental practices and medical clinics. It consists of a **stainless steel frame**, whose base is formed by 5 spokes with double castors to facilitate movement. Seat and backrest ensure maximum comfort and hygiene thanks to the **soft padding and stain-resistant covering of all types** and easily disinfected. A gas mechanism with a regulator ring allows to **adjust the height of the stool** to adapt it to any need.

Technical features:

- Stainless steel frame
- 5-spoke base with double swivel castors
- Padded and upholstered seat and backrest
- Seat height adjustable 51-70 cm via gas spring with regulator ring
- Available in several colors

***Other colors are available on request*
